S.No.: BMC-26-004

Dated: 27 May, 2026

Event Report *The Fast & The Formulae*

The Brahmagupta Mathematics Club, Department of Mathematics, School of Engineering, Dayananda Sagar University, successfully conducted the event “The Fast & The Formulae” on **27 April 2026** at **LH-3, School of Engineering, DSU**. The event was organized with the objective of promoting mathematical thinking, analytical reasoning, and the practical application of mathematics in modern computational and AI-driven domains. The event was conducted smoothly with enthusiastic participation from students across various engineering departments and was well appreciated by both faculty members and participants.

1. Introduction

The Department of Mathematics, School of Engineering, DSU, through the Brahmagupta Mathematics Club, organized “*The Fast & The Formulae*”, a mathematics-oriented technical and interactive event aimed at encouraging students to explore mathematical concepts through engaging activities and competitions.

The Brahmagupta Mathematics Club is an active student-driven initiative that promotes mathematical awareness, logical reasoning, analytical skills, and interdisciplinary learning among students. The club continuously strives to create a vibrant academic environment where students can enhance their understanding of mathematics and its applications in emerging technologies such as Artificial Intelligence, Data Science, and Scientific Computing.

The event also marked an important milestone with the **official launch of the Brahmagupta Mathematics Club Website**, representing the vision and dedication of the newly formed core team. The event successfully blended academic learning with fun and competitive activities, thereby creating a highly engaging experience for all participants.

2. Events Conducted

Brahmagupta Mathematics Club

Department of Mathematics, SOE-DSU

The event comprised three major activities:

2.1 Official Website Launch

The official website of the Brahmagupta Mathematics Club was launched during the inaugural session of the event. The launch showcased the club's mission, activities, achievements, and future vision. The website launch marked the beginning of a new digital platform aimed at strengthening communication, collaboration, and student engagement within the mathematics community at DSU.

2.2 Mathematical Quiz – *The Fast & The Formulae*

The Mathematical Quiz was designed to test participants' analytical thinking, mathematical aptitude, logical reasoning, and speed. The quiz included multiple rounds with varying levels of difficulty and encouraged students to apply mathematical concepts in a competitive environment. The event successfully created enthusiasm among students and enhanced their problem-solving abilities.

2.3 Desmos Graphing Challenge

The Desmos Graphing Challenge was an interactive event focused on graphing and visualization using the Desmos mathematical tool. Participants explored mathematical equations and graphical representations through practical and creative problem-solving activities. The challenge encouraged innovation, conceptual clarity, and visual understanding of mathematics.

3. Participation

The event witnessed an overwhelming response with **25 team registrations** from across the School of Engineering, DSU. In total, **more than 100 participants** enthusiastically took part in the competitions and activities conducted during the event.

The active participation reflected the keen interest of students in mathematics and their eagerness to apply classroom knowledge in a fun, competitive, and technology-driven

Brahmagupta Mathematics Club

Department of Mathematics, SOE-DSU

format. The event also provided students with a collaborative learning environment that promoted teamwork, creativity, and healthy competition.

4. Structure of the Event

The event was carefully structured to ensure maximum engagement and smooth execution of all activities.

Mathematical Quiz Structure

The quiz competition was conducted in four rounds:

Round 1 – Kahoot Quiz: Basic Concepts

- Fundamental mathematical concepts
- Multiple-choice questions conducted through Kahoot
- Focus on speed and accuracy
- Participation from all teams

Round 2 – Kahoot Quiz: Intermediate Level

- Slightly advanced mathematical questions
- Tested conceptual understanding
- Top-performing teams qualified for the next round

Round 3 – Buzzer Round

- Rapid-fire mathematical questions
- Emphasis on quick thinking and precision
- Competitive answering through buzzer format

Round 4 – Pen-and-Paper Round

- Advanced analytical and multi-step problems
- Required detailed solutions and logical reasoning
- Final scoring round to determine winners

Desmos Graphing Challenge Structure

Brahmagupta Mathematics Club

Department of Mathematics, SOE-DSU

The Desmos competition followed a bracket-based elimination format.

Level 1 – Basic

- Fundamental graph plotting
- Simple equations and standard functions
- Focus on accuracy and conceptual understanding

Level 2 – Intermediate

- Combination of functions
- Transformations including shifts, reflections, and scaling
- Interpretation of graphical patterns

Level 3 – Advanced

- Complex and multi-equation graphing
- Visualization-based mathematical challenges
- Creative and analytical problem-solving tasks

The structured format ensured fair competition and encouraged participants to demonstrate both theoretical understanding and practical application skills.

5. Highlights of the Event

- Successful launch of the official Brahmagupta Mathematics Club website
- Active participation from students across multiple engineering departments
- Highly engaging and competitive quiz rounds
- Interactive graphing activities using modern digital tools like Desmos
- Excellent coordination and teamwork by the organizing committee
- Encouragement of mathematical thinking and AI-oriented problem-solving skills
- Positive feedback and appreciation from participants and faculty members

The event created a vibrant academic atmosphere and successfully demonstrated how mathematics can be made engaging, practical, and enjoyable through innovative activities.

6. Results

Brahmagupta Mathematics Club

Department of Mathematics, SOE-DSU

The competitions concluded successfully with outstanding performances from participating teams.

Quiz Competition

- Winner Team – Awarded Certificate and Prize
- Runner-Up Team – Awarded Certificate and Prize

Desmos Graphing Challenge

- Winner Team – Awarded Certificate and Prize
- Runner-Up Team – Awarded Certificate and Prize

The prizes and certificates were distributed by the **Head of the Department, Faculty In-charge**, and faculty members of the Department of Mathematics in recognition of the participants' achievements and efforts.

7. Outcomes of the Event

The event successfully achieved its intended objectives and contributed significantly toward strengthening mathematical engagement among students.

The major outcomes of the event include:

- Increased student engagement and enthusiasm toward mathematics
- Improved analytical thinking and problem-solving abilities
- Better understanding of mathematical graphing and visualization concepts
- Exposure to practical applications of mathematics using modern tools like Desmos
- Enhanced visibility and participation of the Brahmagupta Mathematics Club
- Encouragement for future AI-integrated and interdisciplinary academic events
- Promotion of collaborative and innovation-driven learning among students

Overall, the event successfully bridged core mathematics with modern computational and AI-oriented applications, aligning with the vision of Dayananda Sagar University as an AI-first institution.

8. Coordinators and Organizing Committee

DAYANANDA SAGAR
UNIVERSITY
